Name- Sadvik Karmakar

Registration Number- 25BCE10104

Date- 30/03/2026

Branch- CSE Core

In today’s digital age, having a professional online presence is essential for students and job seekers. It allows individuals to showcase their skills, achievements, and projects to employers, internship coordinators, and academic professionals. In this task, I focused on creating a foundational digital portfolio using platforms such as LinkedIn and GitHub. These platforms help in building a strong professional identity and improve visibility in the digital space.

My work included setting up profiles with proper descriptions, adding academic details, and highlighting skills and projects. I ensured that the profiles maintain a professional tone, use appropriate profile pictures, and present information clearly. This helps in creating a positive first impression.

One interesting aspect of this task was understanding how online platforms can

impact career opportunities. However, I found it challenging to present my skills effectively in a concise manner. Overall, this task helped me understand the importance of maintaining a professional digital presence.
